

Please submit 2-Page Mathematician Report in pdf file on canvas.

(You can choose any mathematician to write this report (start with bio, his/her research; it's better to have this part related to what we covered in class. We have some in our handouts mostly in chapter 3, also use double spaced or less).

This is an example to how to write this report, you can choose any other mathematician and investigate.

For example: [Ludwig Wittgenstein](#)

[\(Links to an external site.\)](#)

is generally credited with inventing and popularizing **the truth table in his [Tractatus Logico-Philosophicus](#)**

[\(Links to an external site.\)](#)

, which was completed in 1918 and published in 1921.

So if I choose him as a mathematician, then using the following link:

https://en.wikipedia.org/wiki/Ludwig_Wittgenstein

[\(Links to an external site.\)](#)

I can investigate to find out more about his work related to truth table.

Summarize all your findings in 2 page (starting with his bio, his work,...)

Note: Work Cited page required.
